

Spinner Flask Accessories

Bio-Simplex™ Spinner Flask accessories allow user to maintain current investment in glassware, but with the convenience of single-use filling accessories. Molded one piece construction creates a seamless fluid path and unobstructed inner bore, eliminates contamination and product loss due to loose connections. Bio-Simplex™ Flex-Joint uses a patent-pending design and construction which eliminates tube kinking and shape loss after autoclaving. Bio-Simplex Flex-Joint designed to accommodate angle deviation in hand blown spinner flasks.

Made from pharmaceutical grade C-Flex® Resin and Tubing to insure an unobstructed fluid path, extremely low levels of extractables and provide an elastomeric seal against glass, plastic and metal surfaces. Can be combined with Bio-Simplex Manifolds and EZ Top® Container Closures to create a closed loop system. Spinner Flask Accessories are manufactured in a controlled facility in accordance with strict FDA cGMP guidelines. Autoclavable or pre-sterilized (gamma irradiated). Custom designs, sizes, and packaging available upon request.

CONTAINER SIZE	DESCRIPTION	PART NUMBER
1 Liter	3 Port Spinner Flask Stopper Assembly with Dual Polypropolene Tubes	45-Spinner-AMG-1L
3 Liter	3 Port Spinner Flask Stopper Assembly with Dual Polypropolene Tubes	45-Spinner-AMG-3L
8 Liter	3 Port Spinner Flask Stopper Assembly with Dual Polypropolene Tubes	45-Spinner-AMG-8L
8 Liter	2 Port Spinner Flask Stopper Assembly with Single Polypropolene Tube	45-1055 Assembly
