Low-Medium Volume Needles

Overlook Industries, Inc. filler needles are designed to quickly and efficiently dispense 0.5 - 30mL volumes. The needles generally come in two styles: Pharmaceutical and Biotech. Please review the following summarized application tables. Be sure to call **888.4NEEDLE** to discuss your application.

Pharmaceutical Style:

Incorporates an advanced hose barb design which secures flexible tubing without clamps. These needles are usually replaced when batch runs are completed.

Biotech Style:

Utilizes Upchurch compression style fittings for semi-rigid Teflon and Poly tubing. These needles are usually left in place for a prolonged period and are cleaned in place and sterilized in place (CIP/SIP).

Application Table:	...
Vials	Reagent Striping
Ampoules	Transdermal Patches
Essential Oils	Nasal Aerosol Containers
Prefilled Syringes	Dispensing for Diagnostic Test Kits

Low-Medium Volume Dispense Issues:	Overlook Industries' Solutions:
Wetting or liquid buildup on tip	Range of fluorinated coatings

Foaming, Dripping, Splashing	Custom tip geometries
Inferior design and construction	Overlook's superior design and fabrication
